In South Carolina's 24-10 defeat on Saturday, the Gamecocks' run game and offensive line struggled to consistently produce against a physical Bulldog defense.

South Carolina recorded just 15 rushing yards at halftime and finished with 41 total. Quarterback Jake Bentley put simply, saying "If you look at their defense, I mean not many teams are able to run the ball against them, "

But it was not enough. The Bulldogs' pressure led to two interceptions, gave up two sacks and allow five tackles for loss in the game. A.J. Turner had eight carries compared to three each for the other South Carolina running backs and Bentley. Turner ran for one of their Gamecock pride was established between Bentley and the offensive line. The Bulldogs' pressure led to two interceptions, gave up two sacks and allow five tackles for loss in the game.

A.J. Turner received eight carries while Mon Denson, Ty'Son Williams and Jake Bentley each had three on Saturday.

A sea of students showing their Gamecock pride gathered on Saturday's chilly morning to register for Service Saturday.

The gameday excitement was juxtaposed with eagerness to serve the community. A group of 2, USC students in particular volunteered with the Habitat for Humanity projects in the community and has now become the non-profit organization's main source of income. It's 94 to 96 cents on the dollar non-profit, said ReStore operations manager Mike Vinson. "We keep four to six cents out of every dollar.

"I did the last one and it was pretty fun," said Alex Braz, first-year international business student. "I felt like it was a productive use of my time than sleeping." The ReStore was founded in order to fund Habitat for Humanity projects in the community and has now become the non-profit organization's main source of income. It's 94 to 96 cents on the dollar non-profit, said ReStore operations manager Mike Vinson. "We keep four to six cents out of every dollar.

The ReStore is in the Top 20 in the nation. It did not place are also still accessible. Multiple vending machines that were already in the cafe has been set up. It offers hot coffee and some Starbucks products, is already closed. In order to work around the construction zone, a temporary cafe has been set up. UC students looking to get their studying done have an array of options to work and study construction in the coming weeks, but they’ll be reminded next semester with a full server Starbuck.

Graduate student Tyler Jones, who also got his undergraduate degree at USC, expects that students will be pleased with the final result.

"It’s going to be good, instead of having to walk up to Russell House like I did this morning," he said.

Still, others like fourth-year business student Sarah Robertson are a bit more skeptical about the change. "It’s sounds good to me, but we also have one right over in Russell," she said. "So I don't really have the point."

“I’ve moved from dumbfounded to mad as hell about the Trump Administration’s insistence on following the Obama Administration playbook to the letter when it comes to handling terror suspects.”

— South Carolina Sen. Lindsey Graham on the Trump Justice Department’s decisions regarding terrorists in prison.

Acquitted S.C. mayor makes headlines with ‘Jay Z’ tweet

After being found not guilty in a DUI case, a South Carolina mayor drew attention on Twitter with his response. "In the words of Jay Z, "not guilty, y’all got to feel me" #vindicated," Greenwood Mayor Welborn Adams wrote. Adams was charged with a DUI in 2015, according to The Greenwood Index-Journal. He reportedly failed a breathalyzer test, but those results were dismissed in court because Adams wasn’t given enough time to read a consent form.

Local students eligible to vote in Tuesday’s local elections

USC students who are also residents of the Columbia area will have the chance to cast their ballots this week, but the question remains: Will they actually go to the polls?

Local municipal elections will be held in Columbia on Tuesday. During this election, the city will decide who will be sitting on the city council seats for district one and four, Mayor Steve Benjamin is unopposed, so that position will not be on the ballot.

With the election pressing, most students said that they were unaware of it. One such student was Khadeem Dennis, a first-year mechanical business student. "I didn’t know [the election] was Nov. 7, but I knew there was one in this month," Fetemie said. "I don’t really care too much about the candidates and I didn’t want to make an ill-informed decision.”

After learning about the election however, Fetemie said he planned on going out and voting. "It’s the first step to something bigger," Fetemie said. "Like the game of Jenga, if you take out the very bottom cube, most likely everything else on the top layers is going to fall out, so you need to make sure you have a solid base.”

While many students said they were unaware of the election, some simply did not care. First-year mechanical engineering student Khadeem Dennis, after learning of the election, still did not plan on voting. "I’m really just not interested in politics honestly," Dennis said. "Usually no matter what you vote, it’s honestly just not really a change, so it’s just not something that interests me.”

While most students had no idea of the specifics of the election, many said they were determined to go out and vote after they were informed, such as third-year marketing student David Toro. Toro was completely unaware of the election. However, after learning of its existence, said he would most likely go out to vote.

"I think it’s important because, you know, it is the city we live in," Toro said. "You have to choose what you want for your city, and if you don’t do it, there’s no way for you to actually make that impact on it.”

I'm a helpful assistant. How can I assist you today?
Turner is part of Karen Mallia’s creative leadership class, which manages the much of the event. They not only participate in the main 24 hours of CreateAthon, but also work with the nonprofits throughout the semester to come up with a media plan. Turner says that part is pretty straightforward, the real challenge comes in meeting the creative design team.

“Our biggest fear was that because Ensemble Eclectica is so hard to put into words when you described it to them they wouldn’t be able to grasp the abstract concept,” Turner said. “All of our worries were gone about the first two hours. I really like our team.”

Aside from brainstorming and creative “jam sessions,” the two biggest moments of CreateAthon are the midnight preview and the final presentations at noon. The midnight preview can be quite nerve-wracking since everyone is quite nervous since everyone is nervous because of the logistics.” This year, with donations from Turner is part of Karen Mallia’s creative leadership class, which manages the much of the event. Coming off a season-high rushing performance against Vanderbilt, A.J. Turner struggled against Georgia's front four.

There were many occasions on Saturday in which a Georgia player would break a few tackles for a first down and would capitalize later for points.

“We definitely should have just tackled better,” South Carolina linebacker Skai Moore said.

Before the game, South Carolina knew it faced a fourth-down test in defense. Chubb and Michel, who combined for 63 of Georgia's 242 rushing yards, which was 46 yards below the team's season average. The Gamecocks also held the Bulldogs to only 4.6 yards per carry, which is 1.4 yards below the team's season average.

What South Carolina did not expect from Georgia was its dynamic passing game.

Quarterback Jake Fromm had a phenomenal game, completing 16 passes on 22 attempts with two touchdowns. This performance gave him an impressive quarterback rating of 177.6, his highest rating this season. His previous high was 97.5 against Florida last week.

“We forced Jake Fromm to play quarterback and I compliment Jake. He played extremely well tonight,” South Carolina head coach Will Muschamp said.

While the end result wasn’t in their favor, the Gamecocks had some individual defensive standout performances as well. Moore led the game with 10 total tackles, his second most this season after he recorded 12 against Louisiana Tech. Five of his 10 tackles against the Bulldogs were solo tackles.

Another was two-time SEC Defensive Lineman of the Week DJ Wonnum. Wonnum set a season-high in tackles with nine and tied for the game high with 1.5 tackles for loss. He was also the only Gamecock this game to record a sack, bringing his season total to five.

Conversely to the Gamecocks, the Bulldog defense came up big in this win, holding South Carolina to just 43 rushing yards — its third lowest total this season. A large part of this defensive effort was due to inside linebacker Roquan Smith, who totaled nine tackles and had multiple game highs in solo tackles with seven, tackles for loss with 1.5 and sacks with 1.5.

Before this game, Georgia was one of three teams in the nation to hold a perfect conversion rating in the red zone this year, going 31-for-31 with 22 touchdowns. The Bulldogs started the 10th play of their first drive in the red zone on the Gamecock's 20-yard line. That play resulted in a forced fumble by linebacker Steve Montac and was recovered by defensive end Javon Kinlaw. This was the first time Georgia did not put up points inside an opponent's 20-yard line this season.

The Gamecocks may have lost, but their defense has a lot to look back on. The defense is just the second to keep the Bulldogs from scoring more than 30 points. It was the second time the Bulldogs did not win by more than 14 points.

“We competed hard. You don't see anybody giving up or backing down from them. We really came out and I thought we played hard,” quarterback Jake Bentley said.

Jamyest Williams recorded three tackles including one tackle for loss against Georgia.

OFFENSE

The American Heart Association recommends 2 ½ hours of physical activity a week.

Get your minutes by walking to class, cleaning your apartment or dancing on the weekends.

Physical Activity is important if you want to feel great, lower stress, get deeper sleep or focus better in class.
Medical use of psychedelic drugs should be legalized

Despite being used since ancient times across the globe, psychedelic drugs remain stigmatized in the United States. The DEA lists psychedelics as Schedule I drugs, meaning they are officially considered to have no more medicinal value than life-threatening substances like heroin. This flies in the face of the actual scientific evidence and medical literature, which has established that psychedelics such as LSD and psilocybin mushrooms have tremendous potential for treating crippling mental ailments such as depression, anxiety, and post-traumatic stress disorder. Research into psychedelics was interrupted by the War on Drugs in 1970, but modern doctors have returned to the subject and found exciting medical possibilities that warrant further investigation.

In contrast to the government propagandists that the substances are life-destroying and dangerous, clinical psychologists writing in the Lancet Psychiatry last year argued that psychedelics are “as safe as taking aspirin.” While there is a risk of unintended effects, most research reviews have found that these effects are very safe when taken in the right setting. It’s a shame that potential medical benefits are being obstructed by outdated drug legislation. The same drug legislation that once made the medical profession and the public unheard of new threats to prevent countless patients affected by mental health issues from receiving potential treatments for their ailments.

As the science behind these substances has been explored, more and more medical professionals are looking to psychedelics as potential treatments for a number of disorders. LSD has successfully been used in experimental treatments for drug addiction, with promising results. The drug has been found to be effective in helping patients overcome end-of-life anxiety associated with terminal illnesses. LSD has also been used in its medical capacity for treating anxiety disorders and as a way to give those who are addicted to addictive substances a way to overcome their addiction.

Psilocybin is also of medicinal interest, with extensive research being conducted at the prestigious Johns Hopkins medical school. In addition to displaying the same healing properties of acid, psilocybin is described by researchers as having “mystical” qualities, with doctors reporting spiritual moments of the patients. Given the patients go through, this is really quite remarkable.

More research is needed before any legislative action is taken regarding the medicinal use of psychedelics, but even a cursory glance at the literature on the topic reveals enormous untapped medical potential in these supposedly deadly drugs.

Our current drug laws regarding the use of psychedelics are outdated and at clear odds with the research that is being carried out. Psychedelic drugs are powerful tools that, when used in the right setting, can profoundly change lives for the better. As more and more positive research comes our way, it’s time we move forward. The drug has been found to improve outcomes for many patients who are suffering from depression, anxiety, and addiction.

It’s time to drop the propaganda that decries these drugs and embrace the exciting medical possibilities that have been revealed by science. Psychedelic research should be encouraged by medical professionals and approved by governments, not by the DEA. This is a complete subversion of our democracy. For a few checks, a self-serving lobby that controls both, the government. The very sort of thing that I was looking for. I know that I am not alone, because the fruit that appears in grocery stores has already been price-gouged and cut to look like the image that is in all of our minds. Aesthetics at times when the dollar is worth more than a ballot. In my view, we must make every purchase count and be aware of the corporations that are out to rip us off. It is time to drop the propaganda that decries these drugs and embrace the exciting medical possibilities that have been revealed by science. Psychedelic research should be encouraged by medical professionals and approved by governments, not by the DEA.

As she brings the program its first national championship, she said how Cleveland Cavaliers star LeBron James told her he was going to bring back his old nickname to title his state of Ohio.

“I know LeBron has had a great feeling for him to come back home and win this ring, because this feeling is phenomenon,” she said. “You can’t even put into words how great this feeling truly is in just being something back to your state, something positive. It’s not great.”

After the final seconds ticked off the scoreboard, Wilson was joined by teammates A’ja Gray and Kaela Davis, who cradled down and embraced her in bear-like hugs.

“It touched my heart to see her crying,” Gray said. “As soon as the buzzer sounded, I knew I wanted to see her. It was an immediate feeling to do this for her. She was an inspiration for me and I’m so glad to see her. She’s cheering for joy. It’s just kind of a front row seat to this game, I hope she’s happy.”

As the No. 1 women’s high school basketball team in the nation, the Gamecocks have long been a fixture in the state’s basketball landscape. Wilson grew up watching Gamecock basketball when she was a kid.

“Obviously, it’s a special time for me,” Wilson said with a laugh. “I was always cheering for the Gamecocks.”

For his part, Thornwell said, “We didn’t ask our guys to do anything, we just wanted them to come out and have fun. They deserve to be here. If they can embrace that, it’s just a great feeling for him to come back home and do a great job for the Gamecocks.”

“I think every team is different,” Nichols said. “I think every game is different. I think every team is different. This year that’s one thing she’s done that really well.”

“I think every team is different,” Nichols said. “I think every game is different. I think every team is different. This year that’s one thing she’s done that really well.”

FEELS LIKE HOME
Freshman guard David Beatty was a highly-touted recruit coming out of high school in Philadelphia, and looks to be a key contributor for the Gamecocks this season.

Another positive Holden will bring is a much-needed outside threat for South Carolina this season. South Carolina has always seemed to need more shooters, and Holden shoot 38.4 percent from three-point range.

Another freshman from New Jersey, Justin Minaya averaged 19.5 points per game, 11 rebounds and 1.1 assists per game as a senior in high school, according to GamecockOnline.com. His senior year highlights show the wing as an explosive athlete who still maintains control in his game. He has a smooth left-handed jumper and looks to be a comfortable shooting 1-pointers as he is explicating to the run. Listed at 6-foot-6 on the floor, Minaya is ranked as a four-star recruit and will most likely play the three position this year for South Carolina. In early October, Minaya garnered praise from Martin, who seemed excited about his potential.

With Minaya having put up 11 points and four rebounds on 6-foot-9 shooting against Everyone the other exhibition game this year, the coated his offensive game. Not only did he have a good game overall, he held his own on the floor and in the flow. With Minaya getting praise for his defensive ability, he should be in line for some start time as an exciting freshman, and should surprise people with his talent.

David Beatty is a highly regarded freshman from Philadelphia and was South Carolina’s highest-rated recruit in 2017. An excellent recruiting guard for the Gamecocks, Beatty is listed at 6-foot-2 on South Carolina’s roster, although recruiting sites list him as being taller. Beatty’s senior year highlights show him to be a hardworking, crafty guard with a strong frame.

Beatty looks to be a versatile scorer with a nice jump shot and 3-point range. Like the other newcomers, the key for Beatty to get on the floor will be his defensive aptitude. Beatty projects to be a contributor as soon as his freshman year, especially given how many players from last year’s squad are gone.

Wesley Myers

Another player with solid scoring ability, Wesley Myers is a graduate transfer from Maine, where he averaged 16.9 points per game. Although a solid shooter at 4.1 percent from 3-point range, Myers primarily scores inside the line. As an effective field goal shooter, Myers shot 47.1 percent from that range. The biggest key for Myers to integrate himself quickly with the team will be to learn Martin’s defensive principles and give maximum effort on that end of the floor. Look for Myers to join Holden as one of the primary scorers this season.

Justin Minaya

A freshman from New Jersey, Minaya averaged 19.5 points per game, 11 rebounds and 1.1 assists per game as a senior in high school, according to GamecockOnline.com. His senior year highlights show the wing as an explosive athlete who still maintains control in his game. He has a smooth left-handed jumper and looks to be a comfortable shooting 1-pointers as he is explicating to the run. Listed at 6-foot-6 on the floor, Minaya is ranked as a four-star recruit and will most likely play the three position this year for South Carolina. In early October, Minaya garnered praise from Martin, who seemed excited about his potential.

With Minaya having put up 11 points and four rebounds on 6-foot-9 shooting against Everyone the other exhibition game this year, the coated his offensive game. Not only did he have a good game overall, he held his own on the floor and in the flow. With Minaya getting praise for his defensive ability, he should be in line for some start time as an exciting freshman, and should surprise people with his talent.

Frank Booker

Booker shoot and move well in the offense, he looks to become a key role player for the Gamecocks. As a senior, Booker was an effective field goal shooter, averaging 13.7 points per game and 5.6 rebounds per game during his senior year of high school. Booker had a high school career that saw him develop and improve his player, eventually helping Gamecocks to have a similar freshman year to Gauys’s last year.

Ibrahim Doumbia

Ibrahim Doumbia is a freshman prospect brimming with potential for the Gamecocks. As a sophomore, Doumbia posted eye-popping statistics 27 points per game, 19 rebounds per game and four blocks per game. The 6-foot-4, 215 forward was able to be swing between the four and the three positions, depending on how Martin decides to use him in certain situations.

Doumbia’s high school coach raved about him as a 24/7, playing his athleticism, size, shooting ability, motor and extreme versatility.

He even compared Doumbia to Rudy Gay and former Gamecock star Michael Carter.

Doumbia also has great shooting ability, and looks to play solid minutes this year as he’s looking to help contribute to the Gamecocks. Martin praised Doumbia’s defensive ability.

“Him and Ibrahim are gonna be fun to watch him for the next four years,” Martin said. “They’re big and they’re talented, and they’re competitive.”

South Carolina will look to continue building the program after last year’s success, and the Gamecocks are hoping these new players help in that endeavor. With many newcomers looking in line for early playing time, they are also able to contribute and help develop to sustain the team’s success in the future.
The 2016-17 basketball season for the both the South Carolina men’s and women’s basketball teams was one of the best in recent memory. 

The South Carolina women were crowned national champions for the fourth time in school history. The team made it to the Final Four for the second time in program history and the NCAA Tournament tournament both since 2001. 

The South Carolina men didn’t exceed expectations, but they did reach the NCAA Tournament for the first time in program history and the No. 1 seed at Colonial Life Arena and the best collegiate women’s basketball team in the nation.

The Volunteers won the only matchup against a team that has won 20 or more games in the past year. This will be a good matchup for both teams in the SEC, but it will be a close game. The Volunteers are more experienced and have the edge in the SEC. This will be a close game, but the Volunteers will win.

The rematch of the 2017 NCAA Tournament championship game will be held at Colonial Life Arena. The SEC season is off to a good start for both teams, but Mississippi State is looking to prove it can play in the SEC tournament.

The Volunteers are coming off a season in which they finished runner-up in the SEC. They have the most assists per game in the SEC last season with 9.3. Mississippi State has the best record in the SEC last season and a 10-0 record in SEC play.

The Volunteers are coming off a season in which they finished runner-up in the SEC. They have the most assists per game in the SEC last season with 9.3. Mississippi State has the best record in the SEC last season and a 10-0 record in SEC play.

The 2017 NBA and WNBA drafts saw a handful of former University of South Carolina basketball standouts selected to compete at the next level. With 2017 came the first Gamecock drafted to the NBA in more than a decade as well as a new USC record for highest draft spot by a Gamecock to the WNBA.

The current total of Gamecocks in the NBA and WNBA is now six — up from just one a year ago.

**Former Gamecocks in the pros**

**Sindarius Thornwell** Los Angeles Clippers

Following a remarkable senior campaign that included "SEC Player of the Year" honors and a trip to the Final Four, Thornwell was selected in the second round (48th overall) by the Milwaukee Bucks. Thornwell became the first Gamecocks player drafted to the NBA since 2006. Shortly after, his draft rights were traded to the Los Angeles Clippers. Through the first five games of the NBA season, Thornwell has seen limited action, but he did manage to post an impressive eight points in seven minutes during a matchup against the Phoenix Suns.

**Alaina Coates** Chicago Sky

The Chicago Sky selected the former South Carolina center second overall in April, officially making Coates the highest-drafted Gamecock in WNBA history. Soon after the draft, she underwent an ankle surgery for the injury that took her out of the Gamecocks’ title run just one month earlier. Although the Sky were hopeful Coates would only miss a portion of their schedule, she would end up missing her entire rookie season.

**Tiffany Mitchell** Indiana Fever

The most decorated player in South Carolina women's basketball program history is the only returner to this list. In her second season with the Indiana Fever, Mitchell posted impressive game averages through the first 27 matches of the season: 10.3 points, 3.2 rebounds, 1.4 assists and 1.1 steals. Her season came to an early close in August after she suffered a knee injury during practice. Mitchell is expected to return for the 2018 season.

**Allisha Gray** Dallas Wings

After deciding to forgo her senior season and enter the WNBA draft, Gray was selected fourth overall by the Dallas Wings. Her immediate impact was evident, as she led all rookies with 1.53 steals per game and 27.2 minutes per game. Her averages of 13 points per game and 3.9 rebounds per game ranked second among all rookies. Gray was named the WNBA “Rookie of the Year” in September, making her the first former Gamecock to accomplish such a feat.

**P.J. Dozier** OKC Thunder G League

After going undrafted in both rounds of the NBA draft, Dozier signed a 2017 NBA Summer League contract with the Los Angeles Lakers. By August, Dozier would ink an official deal with the Dallas Mavericks only to be released a few months later. Currently, he is under contract with a two-way deal between the Oklahoma City Thunder and their NBA G-League affiliate — the Oklahoma City Blue. Dozier has yet to see action in the pros but has the chance to play regularly during the Oklahoma City Blue's regular season, which kicked off Nov. 3.
Coliseo Municipal Tomás Dones is holding victims of Hurricane Maria who lost their homes to the devastation.

The South Carolina men’s basketball team will compete in the Puerto Rico Tip-Off Classic at Coastal Carolina University in November. Originally scheduled to be played in Pajaro, Puerto Rico, the game was moved because of the devastating impact and damage in Puerto Rico caused by Hurricane Maria.

“The aftermath of the hurricane has caused an immense hardship to the island, and our thoughts are with the people of Puerto Rico during this difficult time,” said Pete Derzis, ESPN senior vice president of college sports programming and events. “We are hopeful to be able to return next year to Puerto Rico, where our teams have enjoyed the warm hospitality and rich culture of Puerto Rico for nearly a decade.”

Along with Appalachian State, Boise State, Illinois State, Iowa State, Tulsa, UTEP and Western Michigan, South Carolina will be competing in the tournament beginning Nov. 16 through Nov. 19. The event will feature two teams that made the NCAA tournament last year — South Carolina and Iowa State — and two teams that made the National Invitation Tournament — Boise State and Illinois State.

“The subsequent hurricane has caused an immense hardship to the island, and our thoughts are with the people of Puerto Rico during this difficult time,” said Pete Derzis, ESPN senior vice president of college sports programming and events. “We are hopeful to be able to return next year to Puerto Rico, where our teams have enjoyed the warm hospitality and rich culture of Puerto Rico for nearly a decade.”

Gamecocks face tough road test against No. 13 Maryland

Fresh off a national championship, the South Carolina women’s basketball team’s non-conference schedule is loaded with Marylands. The Gamecocks will play two teams in the Top 13 USA Today Coaches Poll, Maryland and No. 12 Duke, with the possibility of playing No. 1 Notre Dame in the Gulf Coast Showcase before the conference schedule begins.

The Terps worked during the preseason to fix the kinks in their game when they helped represent the United States at the World University Games in Taipei. They showed well, and finished in fifth place.

Last season, the Terps worked during the preseason to fix the kinks in their game when they helped represent the United States at the World University Games in Taipei. They showed well, and finished in fifth place.

Maryland is also known for playing fast up and down the court. For the Gamecocks to win, they’ll need to find a way to slow the Terps down and make them play in a half-court offense.

The Terps are projected to finish second in the Big Ten this season. Maryland lost talent to the WNBA draft and from players who transferred out of the program. Shatori Walker-Kimbrough, who averaged 18.8 points last year, was drafted sixth overall, and Brionna Jones who averaged 19.9 points and 10.9 rebounds a game last year was drafted two picks later. Maryland’s Destiny Slocum, who averaged 11.5 points and six assists per game, announced her transfer to Oregon State via Twitter on May 1.

With the transfer of Slocum, Maryland will have its fourth different starting point guard in four years. True freshman Channise Lewis was the No. 55 recruit according to ESPN, but the Terps are projected to finish second in the Big Ten this season.
Women's basketball routs Coker in first exhibition game of season

Brandon Alter

In an exhibition game with a score of 21-4 after six minutes of play, there were few things that stood out in the Gamecocks' 116-56 exhibition victory over Coker at Colonial Life Arena on Friday.

South Carolina graduate transfer Lindsey Spann was one.

The redshirt senior was 6-for-6 from the field, 2-for-2 from the arc in the first half, and 6-for-6 from behind the three-point line.

Point guard Frank Booker said, “Some shots were off balance or not shots that we usually take, we are going to try and get the ball inside more and play inside-out basketball.”

Head coach Frank Martin added, “I can’t sit here and tell you we’re a good shooting team and then tell them they can’t shoot … we got to find a happy medium.”

Whether it was nerves, bad shots or a combination of both, the Gamecocks are hoping to improve their shooting performance in their next game.

In the first half, the Gamecocks came out of the gate quickly, just over halfway through the period, they posted a commanding 28-8 lead over the Flying Fleet.

The Gamecocks continued to dominate the first half by finishing it with a 20-10 run over the last seven minutes.

Overall, the first period proved to be the better of the two halves, with the Gamecocks shooting 41.2 percent from the floor and 40 percent from deep.

The second half was a different story.

While the scoring never slowed down, the shots stopped falling. The Gamecocks began to utilize their size inside, along with easy fast-break points to blow the game wide open.

Despite shooting just 37.5 percent (26-for-68) from three-point land, the team still shot for more than 40 percent for the game.

The Gamecocks played many different player groups to experiment with who meshed well together. Players who stood out include Booker and Minaya, along with Silva and sophomore forward Mark Kotsar, who most fans expect to have breakout seasons.

While they showcased their ball handling, David Beatty, Kory Holden and Khadim Gueye didn’t have very even scoring, David Beatty, Kory Holden and Khadim Gueye didn’t have very even scoring, David Beatty, Kory Holden and Khadim Gueye didn’t have very even scoring, David Beatty, Kory Holden and Khadim Gueye didn’t have very even scoring, David Beatty, Kory Holden and Khadim Gueye didn’t have very even scoring. Martin preaches heavy ball movement to his 40-player first team and that’s exactly how they played on Monday. They were very unselfish with the ball, sometimes even passing up open shots, and will look to continue that playing style on Sunday in their second exhibition against Virginia Tech.
