

**Disability Affairs Committee**

**Annual Report 2004-2005**

The Disability Affairs Committee met in the Spring of 2005 with Karen Pettus, the new Director of Student Disability Services. The committee discussed their role and ways the committee can better serve the University community in general.

The committee will focus on making the facilities and programs not only physically accessible but also communicating needs to the university and looking for ways to improve services to students, faculty and staff. The committee addressed providing more information and training to faculty and staff along with improving communications about programs and services.

The committee plans to meet again in the fall to update the purpose, mission and goals of the committee and to look at grants and other opportunities available for the campus.
