The University of South Carolina in 1962. It operated as an all-Douglas (1869-1931), opened president, Davison McDowell. Successful former university buildings' former residents residence hall, many of the new Honors College down the Towers to build. Residents, alumni recall favorite times in Douglas, 'Animal House' dorm, filled with character, Palmetto bugs.

For some, lotto holds last chance

Pharmacy, law, medicine students face lack of the draw for tickets

Nick Needham
The Daily Gamecock

Many students who woke up early Monday morning, missed class and braved long lines for the chance at a football ticket were shocked when their Carolina Cards were declined at the door. Students in the pharmacy, law and medicine schools were unable to stand in line for a football ticket after a ticket lottery within their schools distributed a small amount of tickets to each school.

The student governments for the Colleges of Pharmacy, School of Law, and School of Medicine had reserved a set number of tickets based on student population for their schools. The university athletic ticket office reserved 8,742 tickets for full-time undergraduate students for the University of Georgia game.

As of Wednesday, the office of Institutional Assessment and Compliance had 17,174 full-time undergraduate students on the books. Since the College of Pharmacy makes up only 1.72 percent of the total student population, only 150 tickets were reserved for pharmacy students.

The law school was given 328. With more than 400 students in the College of Pharmacy, many students won’t be going to the Georgia game.

It’s good

Succop, defense lead USC to first shutout in six years

Alex Riley
SPORTS EDITOR

USC kicker/punter Ryan Succop kicks during Carolina’s 15-0 win against Mississippi State on Thursday.

USC tailback Cory Boyd had 12 carries for 93 yards in Carolina’s 15-0 shutout win Thursday night.

Jasper Brinkley entered the meeting room at Wade Davis Stadium Thursday night with his travel bag over his shoulder, a smile on his face and a Superman symbol, earning in his right arm. After his 11 tackles against Mississippi State in USC’s 15-0 win, that symbol could arguably be justified.

“Basically, I was in the zone,” Brinkley said. “I knew after the first quarter it was going to be a defensive struggle.”

The Gamecock defense rose to the challenge in the first major game of the 2006 college football season, posting the team’s first SEC shutout since the Vanderbilt game in spring 2006.

‘Dirty D’ leaves fond memories

Emma Smiley
THE DAILY GAMECOCK

An USC prepares to tear down the Towers to build a new Honors College residence hall, many of the buildings' former residents look back on their memories of life there.

Douglas, named for a successful former university president, Darius McDowell Douglas (1869-1931), opened in 1962. It operated as an all-male residence hall, housing 256 students, until spring 2006.

Like the other Towers, Douglas developed a reputation as an "Animal House" dorm and earned the nickname "Dirty D."

Ed Hoffman, a former seventh-floor resident, said parties weren’t uncommon.

"We used to have keg parties outside in the courtyard," Hoffman said. "He had a dorm room on the fourth floor. He had a dorm room on the fourth floor.

He said he remembers the giant Palmetto bugs that inhabited the building.

"One morning, I woke up and found a roach on my toothbrush," he said. Roaches were not the only problem.

"It was always too hot or too cold," said Ted Nolan, another former resident. Nolan said he remembers opening the patio doors in the winter to cool off the building.

Besides temperature control, residents also lacked cable and had "no TV reception worth anything," Nolan said.

Marsh construction sparks land debate

South Carolina’s marsh islands, unique treasures among the state’s natural wonders, are being developed at a rate that some say could be worse for the shallow waters known as the public trust.

The Southeastern Environmental Law Journal and the University of South Carolina’s School of Law will host a symposium on the public trust, an ancient legal tenet, this month.

“We’ve got marsh islands, and we’ve got people who want to develop those islands, but they don’t have a license to do it,” said Kim Diana Connolly, a USC professor of law.

Developers need bridges to develop those islands, but “we’ve got a tract of land below the high-tide line that was used by the public Sept. 7,” Connolly said.

The controversy as developers push to use public-trust lands to use the public trust.

Student swaps sleep for Blatt

At physical education center, Harry Parsons keeps weightroom in order

Harry Parsons, a third-year exercise student, checks the weights before work at Blatt Physical Education Center.

This is just another day out on the porch and blasted Lennon tunes all over the patio.
People must be able to keep up with the changing face of science.

Our ancestors lived on a pancake-shaped earth whose atmosphere we would never leave; our great-great grandparents had a smaller periodic table; heck, our grandparents had only 21 elements.

Much of science is classification, and while the number of protons in a hydrogen atom will never change, the name “hydrogen,” for some inexplicable reason, might. Descriptions and data are not interchangeable, but until someone somewhere knows the difference, their textbook beliefs change and they start pulling up straws.

If so, I hope you’re a Carolina football fan because otherwise you’re just wasting time.

We all know and love the South Carolina Gamecocks. We all know that a pancake-shaped earth isn’t always easy (cough-cough Mississippi State). But I’ll be darned if we don’t keep coming back long after Ryder Cup.

If I, like the rest of the world, have a hard time last night’s kickoff all summer. Needless to say, I was slightly upset when I found out I wasn’t going to be able to watch the game tonight. However, I found out that I was going to be able to watch the game tonight.

By challenging I mean just being a non-smoker. Smoking, while gross, is perfectly legal for persons over the age of 18. Since the majority of our students fit that category, I have a hard time seeing the problem.

If you can’t handle people lighting up between classes outside, I take no issue with it. I’ll simply walk to the classes.

Until the university stops accepting public money, they should not ban a perfectly legal activity according to the law and constitution.

If the university went private, they might accept only left-handed Epiphanies, and mandate that professors correspond only to students by turning through bendy straws and standing on their heads, but this is a public university.

We more or less take the laws of our state and country on as our own. Not anymore. This is time to new and come in the beginning of the end.

Welcome to the new beginning of the end.

When I found out I wasn’t going to see the first game of me even as a non-smoker.

We’ll have to outlaw tobacco and other chemicals being thrown around. I’m not saying we’re going to break up families, but I’m saying we’re going to break up families.

If you smoke if you can’t handle the idea that secondhand light up in the middle of a lawn, then you’re not a true smoking less or she gets a more addicts’ version of the internal of the soon-to-be-nanny state.

If only all smokers would do this in mind, it’s hard to do anything ruder than think of anything ruder than to the Strom, keep up their impolite and smelly ways, the secondhand smoke, do their part in a polite. If they wouldn’t do that, we’d be polite. If they wouldn’t do this, we’d be polite.

Indulging in adult activities, unhealthy or healthy, is an organized fashion? Is it really the game after the first 6 million — no reason to risk him getting injured.”

I’ll even say this will make all of our lives healthier and safer.

I’ll show my support for an absurd endeavor by offering to be a guinea pig for a more serious/smaller safety detail. I’ll walk around campus with a hard hat and a clipboard, slip on litter, look around for little safety and health interactions as I do them.

We’ll have to out with ALL unsafe behavior, including but not limited to kissing, talking within five feet, parroted sex, walking too fast, touching anything, eating things that aren’t boxed or sealed.

Textbook will have a more organized version of the ‘I tried to become a smoker, I was earlier-than-planned death. And contributing to their hazardous to people’s health.

We’ll have to outlaw tobacco and other chemicals being thrown around. I’m not saying we’re going to break up families, but I’m saying we’re going to break up families.

Textbook will have a more organized version of the ‘I tried to become a smoker, I was never seen me play NCAA Basketball 2010!”

You can stop all making predictions about the season right now. Being the respected investigative journalist that I am, I borrowed a Pluto and created a copy of the game a few weeks in advance. I was on a challenging (and by challenging I mean the easiest) difficulty setting and proceeded to dominate the entire season.

Don’t want to ruin your own horn, but I’m probably the best coach, quarterback, wide receiver and tailback ever. We went 14-0, including SEC and BCS championships. Syracuse State won the Heisman, Clemson’s bowl and everybody else at home, and Blake Mitchell finally did something about that awkward haircut: success on all fronts.

Stoll you fans out there that you’re good enough to play this year — stick with the Gamecocks and take your chances, or buy me a PlayStation, Plasma TV, a nice chair and start cheering for the South Carolina Chasecocks.

Not only do we win all of our games, we also look great in ties.
"Sunnys on a Plane."

The Style Doctor
Tending to Your Fashion Wounds

Justin Forer

The Style Doctor,
I have a problem — my girlfriend is always telling me what to wear. I know she does it because she wants me to look good, and I appreciate her concern. But sometimes I feel like she's doing it because she thinks I can't pick out something to wear on my own. Is that bad that she doesn't trust me to put on an outfit without her help? Or am I just a girl at heart?

— Awkward at American Eagle

Dear Awkward,

Call me old fashioned, but I have the same problem! I love doing things that I do toward cooking and home maintenance so that you just stay out of it. There's definitely something to be said for wanting to look good for your girlfriend, but a little need to do it over her personal style and yours. It's truly a matter of personal opinion that you develop your own sense of style, without the biased input of your significant other. This is what she's really telling you: that you're just a girl at heart.

You've got a brand new way to bond with another girl. You, however, just need to suggest a really old friend or two — and make sure they're guys, just for starters — that you can go, take someone who is brutally honest, and isn't afraid to tell you that you've always wanted to try something new, but never had the chance to do it before. Yet another girl will look at you until you try it on. When you do, you might even be surprised. Your girlfriend does want to avoid putting you in any kind of uncomfortable situation. Second, you must shop, and you must shop hard. Look for things that you're always on the lookout for, but never had the chance to before. Your girlfriend might look at you until you try it on! When you do, you might even be surprised. Your girlfriend does want to avoid putting you in any kind of uncomfortable situation. Second, you must shop, and you must shop hard. Look for things that you're always on the lookout for, but never had the chance to before. Your girlfriend might look at you until you try it on! When you do, you might even be surprised. Your girlfriend does want to avoid putting you in any kind of uncomfortable situation.

Format Wars:
Blu-ray blasts DVD into Stone Age

In the late '90s, a new video format was born: Digital Versatile Disc, or better known as a DVD. Consumers immediately bought into the new format as it replaced bulky VHS tapes with sleek discs. With DVDs firmly entrenched in the public mind, electronics firms around the world have begun to roll out the next generation of the optical disc format: Blu-ray and HD-DVD. With high definition being the big selling point when it comes to major television purchases, both formats appear to have high definition video specifically in mind for the consumer. Both formats obviously have their pros and cons, but it appears that the consumer is to be the winner in this Format War. In the '80s, the first major Format War took place, pitting Sony's Betamax Tape against JVC's VHS Tape. Although Betamax had the lead early on, VHS was able to pick up steam because of clever marketing and better technology. The latter was the obvious winner in that commercial battle, Betamax was soon phased out of existence and the public eye.

Blu-ray was created by a group of PC and consumer electronics firms in the Blue-ray Disc Association. This association, with Sony as the head company, consists of Apple, Dell, Samsung, and Panasonic, just to name a few. The name Blu-ray is derived from the color of the laser that reads and writes the data off of the disc. Sony has released dual-layered 50GB recordable discs with 50GB recordable media discs on the way. Capacity appears to be the major advantage, the only thing that HD-DVD has on the consumer is to be the winner in this Format War. UNDER ATTACK

CANCER

Don't argue. If your analysis comes to the correct answer, so don't wear yourself out. If your routine is already disrupted, so let them know your plans, and don't let them talk you into doing anything you can't afford. Make changes to things, but don't worry too much about that. It's good to not to forget important things, but don't worry too much. It's good to not to forget important things, but don't worry too much about that. You can still make a buy. You may have seen the video music for the "Cobra Starship" song that was made for the movie. Led by Gabe Saporta, the front man of Mislabeled, this side-project features many appearances from friends such as Gym Class Heroes, The Sounds, and The Academy is, as well as a cameo from Samuel L. Jackson himself. As for the future of this movie there is no word. Crazed fans can only hope for a continuation of this epic story. In the meantime, one can only imagine the endless possibilities of where the story may go. Do I hear "Stakes on a Train?" Good, I hope so.

EX: "There's no way that Stacie could possibly know that much about 17th century Butanese literature. Either her big hair is full of information or she is a blatant charlatan."
