New Website

The Maritime Research Division (MRD) of the South Carolina Institute of Archaeology and Anthropology launched a new and improved website. The new website features current research and past projects, the South Carolina Underwater Antiquities Act, listing of current staff, and a page devoted to the Sport Diver Archaeology Management Program (SDAMP). The SDAMP page on the MRD website provides access to the hobby diver license forms, online reporting, listing of online resources for sports, downloadable trail guides for the Copper River and Ashley River heritage trail, and current events schedule. We are attempting to reduce the paper artifact report forms submitted to our office so please take advantage of the online report forms and save postage!
