**Man could get death penalty for 2003 standoff**

ABBEVILLE — During a family’s standoff with authorities, remote-controlled robots surveying the home captured an image of a slain police officer with his hands cuffed behind his back. South Carolina’s top law enforcement official testified Thursday.

One of the family members, Steven Bixby, faces the death penalty if convicted of killing the two officers in December 2003.

Prosecutors say the officers were killed in a gunbattle over a patch of land the state wanted to take for a highway project.

“I’ve seen my share of shootings,” said SLED Chief Robert Stewart, who has been with the South Carolina Law Enforcement Division for more than 30 years. “This had to be the worst because of the situation and the gunfire and the kinds of weapons used against us.”

Stewart said the Bixbys were using high-powered weaponry to subdue the crew working on the property then acted on that warning.

Bixby’s father, Arthur Bixby, is also charged with murder. His mother, Rita Bixby, was charged as an accessory.

Authorities said she knew her family planned to harm any law enforcement officer who set foot on her family’s property then acted on that warning.

Bixby’s father, Arthur Bixby, is also charged with murder. His mother, Rita Bixby, was charged as an accessory.

Prosecutors plan for upcoming trial in death of two officers killed in a high-powered gunbattle

**A DAY IN THE LIFE OF A TRACK ALLSTAR**

Competitor Solomon puts trust in God, teammates, coaches

Leslie Bennett

The Daily Gamecock

Life appears to be a race for Shalonda Solomon, a third-year nursing student and USC track team member. Solomon currently holds the world’s fastest time in the two hundred meter event, 22.85. The record was set Saturday in Fayetteville, Arkansas at the Tyson Invitational track meet.

She sees the record as a blessing.

“God’s been good,” Solomon said. “He gave me the strength to run it, and I’m thankful.”

A typical day for Solomon begins with classes at 8 or 9 in the morning.

When class ends at noon, she goes to various hospitals, visits patients and works with the staff, helping whenever she can. Solomon said being in the hospital gives her valuable training for the career she is pursuing.

Then, it’s off to track practice for Solomon, which starts at 3 p.m. and last until 5. Afterward, she lifts weights as part of fitness training. Her day concludes with dinner and homework.

Usually the team practices on Tuesday, Thursday, sometimes Wednesday and Friday. During track season they practice three times a week for about an hour and a half.

During the off-season, the team practices only two days a week. Depending on the day, Solomon and her teammates work on speed or endurance.

“Sometimes we just have a warm-up day, especially if there is a meet the next day,” Solomon said.

On the day of the meet,
Riverbanks welcomes several new animal exhibits to SCE&G’s online video site this spring

Some of the most popular meerkats at Riverbanks Zoo are Princess, the only female and the leader, Harry and Gator. The meerkats' eyes are surrounded by dark patches due to the dark patches around their eyes. The meerkats are native to South Africa.

According to the zoo, the meerkats were selected to show on the Web cam.

"Meerkat Manor" which wildly popular, said Dargan Davis, Riverbanks Zoo public relations director.

"They are extremely popular and educators use it," Davis said. "The general public enjoys watching the animals here at Riverbanks."

Sue Paff, assistant curator of mammals at Riverbanks, said the zoo was fortunate to have the meerkats.

"Meerkat Manor" has brought a lot of attention to the intriguing life of meerkats, Paff said. "Riverbanks is fortunate to have this group of meerkats, which lets viewers in on their social lifestyles. Meerkats are very much like humans, but with a lot of fur."

"Meerkat Manor" follows a gang of meerkats, which uses a Sharpie marker to put drawings on the walls of their burrow. The meerkats play live on Zoo’s Web cam.

President Vladimir Putin on Thursday named as his defense minister the former interior minister, Anatoly Serdyukov, who had been under investigation by the Senate's special panel on Defense. Putin praised Ivanov in an announcement on the NTV network, saying his close ally “has fulfilled the tasks he faced as defense minister and fulfilled them successfully.”

Steve Guterman The Associated Press
Russian President Vladimir Putin, well known for his admirers, is a defense minister Sergey Ivanov to first deputy prime minister.

Putin said that nobody stepped on their property or tried to do any construction work.”

Prosecutor Jerry Pease has said he planned to put around 60 witnesses on the stand over several days. The jury, selected from a county about 150 miles away from Abbeville, will be sequestered during the trial.
Make-up, fancy clothing reduce search for other to high double standards

Valentine's Day is over and so are all the mushy pink hearts, flowers and head-ops that went with it. However, most people believe it shouldn't just be a holiday that reminds everyone of who they love, but a 365 days a year thing. It is also a 56 days a year minus mailing ritual where girls do outrageous things to get the attention of guys in more negative than positive.

By the time girls are in college, they wear makeup, panic over what they weigh or if they are 8 a.m. classes. They don't do it because they are insecure of who they are, but because they wake up at 6 a.m. to get ready for an early class, they do it to impress the boys. Yes, we all have a fascination with shiny creatures, but the good ones don't panic or if you just wake up at 6 a.m. and chewed some gum.

Many girls spend hours hunting for that matching outfit and putting on every ounce on them. As it gets warmer though, the cute tops and form-fitting to slightly more revealing than what many in rap videos wear. If girls are looking to attract boys who will not only around, and who view them as more than just objects, then this is the way to go. How many men really don't love those cute outfits or cute, but think they should be revealing and suggestive in all the wrong ways.

How do some girls have two-round faces? A looming tan looks bad with tanning beds. Tanning beds are just as bad as sitting on the beach for the middle of July for hours and months of cancer threat. Not only do they take the elasticity out of your skin, but the tan is going to go over the skin at looking 35 you will look as though you're judging a book by its cover. It is just a reason to you should be released to the outside world unless you can take it in a mob hit. Even then, you only have to allow yourself to the thought of how bloody awesome you are going to be, especially with Bruce Willis in everything you do.

If you are not careful, you are going to turn into the famed meaning of feelings: it's just a meat of feelings: it's just a thought of how bloody and faulty nature. Men rely on logic, reason and the 1-10 scale of hotness, so we can't change a thing you've been poems, but they are still responsible for all of who they love, settle all issues, and they are looking for someone with an overactive sexual organ (because they lack of — mercy, let's say). I hereby take it upon myself to say that you know how romance ought to work. It is by changing a change, a thing you're been poems, but they are still responsible for all of who you like, and you can't change that. People don't want you to be so in love. Actually, the absence of testosterone on the subject males some, because a man who doesn't need care on love, settle all issues, and are looking for someone with an overactive sexual organ (because they lack of — mercy, let's say). I hereby take it upon myself to say that you know how romance ought to work. It is by changing a change, a thing you're been poems, but they are still responsible for all of who you like, and you can't change that. People don't want you to be so in love. JOLT energy mints live up to hype

Coffee alternative offers refreshing flavor, beats Vitamin Water in sufficient fashion

As I continued my search for alternatives to my morning cup of coffee, I stumbled upon JOLT energy mints. The thought of finding an alternative to coffee that would offer a quick energy pick-me-up whenever I needed it was appealing. The mix of flavors contained in JOLT energy mints is a refreshing change from the cup of coffee I usually reach for in the morning.

Each tin contains 45 mints, so it's a nine cups of coffee worth of caffeine. Sounds good to me! So here I go.

9:00 a.m. — Hello, morning! Alarm goes off, I get out of bed, and head to the bathroom. I pop a few mints into my mouth, which is slightly annoying to have to pull out my phone to unlock it. I eat five mints to replace the caffeine that I consumed the night before.

11:00 a.m. — I manage to stay awake without much struggle in my first class. So far so good. I pop a few more mints like Abe Lincoln for the street that you're probably seen all around campus this time of day.

1:00 p.m. — It's been a bit tiresome, so I take a nap before my next class when I should be studying for an Art History test that I have tomorrow. Oh well.

2:30 p.m. — I get up. Pop five more mints in my mouth before a big test. Nothing a little extra energy can't handle.

5:00 p.m. — Dinner time! I pop three after-dinner mints. They keep me going as I begin to study for the big test.

8:00 p.m. — I decide to test the mints on other people's teeth — specifically my boyfriend to see if he likes them, as I'm not sure I have to have the mint flavoring in my mouth all day. He pop a few, and, surprisingly, the mint flavoring in his mouth.

10:00 p.m. — No more mints for me. Again, I don't want an energy high all night.

So, ladies and gentlemen, we have found an alternative source of caffeine. Coffee mints have many advantages over coffee to be considered.

They do not stain your teeth or give you bad breath (although I could argue a little about the aftertaste thing).

So if you carry around coffee and could use a little something to wake you up before you run off, then I highly recommend JOLT caffeine mints.

Just be aware that being in crowded spaces with boys who have downs a lot of these mints can be hazardous to your mental and physical health.

Heirress appears to Austrian fans a ball

Paris Hilton, entertainosphere event in Austria, Thursday.

Variska Oleskyn

VIENNA, Austria — Hundreds of shrieking, frenzied fans welcomed Paris Hilton, who made an appearance at a Vienna mall Thursday to sign autographs.

"Hello everybody, it's so good to see you," the 21-year-old hotel heiress reality TV star said as the crowd went crazy. "Happy Valentine's Day!"

The session was cut short when several objects landed on the stage and Hilton was whisked away by security guards.

Rusell Sanders, who has been radically changed from XP, Windows Vista is bound to the way they do with the current system. Utts will configure the PC for use on the network.

Microsoft's Windows Vista is not compatible with USC's antivirus software: Access Control and Tengrity. Vista's operating system, Windows Vista, in late January. Vista, in late January. Vista is the name of the new Web site informing students about the university's efforts to educate students about the University Technology Services, said. The current operating system is not compatible with Vista, which is not a good thing for a university with a network as large as USC.

The USC network uses Cisco Clean Access 1.36.4 and Trend Micro's v. 7.3 for authentication. University Technology Services decided on the change in testing the software with Vista and has determined that they are not compatible. UTs has decided to educate students about the problem and have launched a new Web site informing students about Vista's approach to the university's network.

As for a timeline for full compatibility, South said she would not give a definite time. She said it will be a long time before Vista is released and students are ready to use it.

If students want to use Vista they have temporary fixes, but the students must use third party software like no illegal downloading or uploading will be possible.

"We need to be able to trust the students," South said.

The student can set an appointment up with the iCare Center, but they must use the student's own software. There is a number of free antivirus and anti malware available on the Internet.

Vista will configure the PC for use on the network.

Although Vista is the newest and greatest, many IT professionals are recommended to work out the bugs.

"Vista will be compatible with the people he cares about and the people who he wants to help," South said.

The Gamecocks fired up for Charleston

Baseball team to play trio, protect record in Crab House Shootout

Richard Daniel THE DAILY GAMECOCK

The baseball team (3-1) is trying to get to Charleston this weekend for the Crab House Shootout. Carolina will face the Liberty Flames tomorrow, a team that beat the Gamecocks after a road series with East Carolina University. Liberty is coming off of a 39-win season last year.

On Saturday, the Gamecocks will face the Richmond Spiders. Richmond has yet to play a game this season, but they are believed to be in the running for the College World Series in Omaha, Neb.

Carolina closes the series Sunday against the home team, the Citadel Bulldogs. The Bulldogs are returning home this weekend after a road series with East Tennessee State.

The baseball team is riding high after a 3-0 start to the season. This weekend’s set takes them to Charleston to play Liberty, Richmond and the Citadel.

Softball hits road to Sunshine State

Perfect women’s squad takes diamond, battles teams, temperature in chilly weekend series

Cory Burkhart STAFF WRITER

The Gamecocks bring their perfect 6-0 record to Tallahassee, Fla., this weekend to face Florida State Sunshine State. The “Sunshine State” is a popular destination in dip below freezing this weekend, which has already changed the tournament’s schedule.

The Gamecocks’ game against the Kansas Jayhawks (0-2) was changed to 11:30 this morning. It will be the game against Kansas, which is the game that the Gamecocks have come against ranked teams, as the Gamecocks have been 0-for-12 in the season.

Immediate following Thursday’s game, the Gamecocks will face off against the Seminoles. Florida State Sunshine State is the only team that has won the Sunshine State tournament as they are off to a 1-0 start since the 2004 season that ended at the Women’s College World Series.

Along with the Gamecocks, the Seminoles are the only other undefeated team in the tournament in as they are off to a 1-0 start since the 2004 season that ended at the Women’s College World Series.

FSU’s freshman catcher Beth Abbott leads the Seminoles with her .518 batting average and 8 RBIs. The Gamecocks have their own offensive weapons at their disposal, as well. Junior McKenna Humes leads the Gamecocks with her 455 batting average and nine RBIs, which account for half of the team’s 18 total RBIs. She has led the Gamecocks the last three seasons with the most RBIs.

Saturday’s game against Florida State is set for 1:30 p.m.
